CAREER OBJECTIVE

To obtain a challenging position in the field of software and web development where I can utilize my knowledge of programming languages such as C, Java, Python, C#(.NET), and PHP, along with my expertise in frontend technologies (HTML, CSS, JavaScript) and databases (SQL, MongoDB). Currently enhancing my skills in React.js and Node.js, I aim to contribute to innovative projects, develop efficient solutions, and grow as a full-stack developer while adding value to the organization.

PROJECT

Online Railway Reservation System

ASP.NET using C#

- Developed a web-based railway reservation system to manage ticket booking, train schedules, and passenger details.
- Implemented user authentication, ticket generation, and cancellation features.
- Used SQL Server for database management to store and retrieve user and train details efficiently.
- Worked in a team environment, focusing on backend logic and database integration.

BILL generate Web application

HTML, CSS, JavaScript

- Designed and developed a responsive web application for generating bills dynamically.
- Implemented features to add multiple items, calculate total amounts, and apply styling for better UI/UX.
- Integrated PDF export functionality to download the generated bill without displaying UI elements like buttons.
- Ensured cross-browser compatibility and optimized the app for smooth performance on different devices.

Certification

- STTP - on Essential Python Libraries for Machine Learning, Data Visualization and Data Analysis [LDRP-ITR]
